

Biography: Brittany Lee

Water Quality Division Matrix - San Antonio Region
Texas Commission on Environmental Quality

Current Position

As an Aquatic Scientist, Brittany evaluates water quality, assigns standards and assesses impacts to water bodies affected by wastewater discharge permits as well as implements water quality standards, site specific water quality criteria, and water quality management procedures.

Prior Experience and Education

Brittany Lee attended Texas State University as an Aquatic Biology and Chemistry major and graduated in fall of 2008. While in college she interned with the TCEQs, Utilities and Financial Review Team, Confined Animal Feeding Operations, and her current team, what is now the Water Quality Standards Implementation Team. Brittany currently conducts all types of standards reviews to include MS4s, John Graves Scenic Waterway Restoration Plans, TPDES permits, Individual Storm Water permits, 401 Water Quality Certifications, Mitigation Banks, 316(b) biological data, Thermal plume studies and CAFOs. She also serves as the Interagency Review Team liaison for the TCEQ in the Galveston District of the Army Corps of Engineers. She became a full time staff member with the TCEQ in September 2008 and has enjoyed her team, as well as her division ever since.
